ORMSBY CASE GOES OVER.

Hearing Postponed in Boston-Date

for Trial Not Known. Contrary to expectation, the case of Mrs. Amy L. Ormsby and her divorced husband, George F. Ormsby, for the possession of their child, which was sched uled to come up in court at Beston, Mass., yesterday, was not called.

Boston on Friday last, is still in Maryland with the child, which was given into her possession pending the action of the court. Her relatives in this city said last night that up to a late hour, they had had no word either from Mrs. Ormsby or from Boston.

A special dispatch to The Washington Herald last night from Boston said that the case did not come up yesterday, and that, although it is not known definitely. it is thought that the case there has been indefinitely postponed. During the proceedings there, Ormsby stated that the fight will be continued in Washington and Ohio courts.

It is the present intention of the board to ask Congress for an appropriation of \$1,000,000 in order that fresh experimental work may be begun in this country. The idea of the Signal Corps is to obtain a large dirigible balloon equal in efficiency to and larger than the French balloon La Patrie.

Aerial navigation, in the opinion of the

army, has already reached a stage which promises great practical developments in the near future, and the value of a dirigible balloon as an engine of war has, it is believed, already been demonstrated. A fleet of dirigible balloons, it is pointed out, would be a valuable adjunct to the coast defenses of a country, as they would be able to sail out against an ap-

proaching fleet without exposing themselves to the enemy's fire and would be able to make quick and accurate observa tions of the enemy's strength. Little confidence is placed in the heavierthan-air machine as an engine of war, as this type of machine will, it is believed be limited to carrying small burdens at
